## EDUCATION

2008

High School: Science

Saint Mary's Hubli (Percentage-85%)

2010

PUC: Science

Vidyaniketan Pu Science College Hubli (Percentage-86%)

2014

B.E: Computer Science and Engineering

K.L.E institute of technology hubli (Percentage-70%)

## ACCOMPLISHMENTS

- Won 3rd at Hackathon which was conducted on November 2015.

## CERTIFICATIONS

Amcat Certified Data Processing Specialist

## APART FROM WORK

### Fusion Mate (<https://fusionmate.com>)

Working on a collaborative web application features such as Project Management, Event Management, Helping I.T companies to track their events and tasks more efficiently.

- Application is built using Laravel framework and node.js

### Features

- Create team and add members.
- Collaborate with team members privately and publicly in group .
- Create task for each of the team members and keep track of it.
- Create an event and add attendees to the event and send notifications.
- Share files, snippets etc on a group or private chat.
- Get notifications of the backlog tasks of team members.
- A dash board for each user to give a birds view of what they are involved in including ongoing tasks , completed events, events attended or responded

### How it Works

Since its a collaboration Application ,Users can interact wit each other.This is real

time application. There are two modules the Project head followed by lead and its members. Project head can create as much team as he may wish and has an option to assign a lead to each of the team created. Lead or project head can add members to its teams. Security check is applied across users.

Users can join the team and start collaborating with each other.

The project head and team lead has the option to create tasks and assign to its members and can keep a track of it with a neat elegant dashboard. The same follows for event management where events can be assigned to its members.
